INCIDENT MANAGEMENT SITUATION REPORT WEDNESDAY, MAY 10, 2000 - 0530 MDT NATIONAL PREPAREDNESS LEVEL II

CURRENT SITUATION:

Diminished winds assisted crews in making progress on the large fires in New Mexico and Texas. Nationwide, no new large fires were reported and initial attack activity was minimal. The National Interagency Coordination Center mobilized helicopters, single engine airtankers, infrared aircraft, meteorological equipment, radio equipment, engines, Type I and II crews, and miscellaneous overhead. Very high to extreme fire indices were reported in Arizona, New Mexico, Texas, Oklahoma, and Michigan.

SOUTHWEST AREA LARGE FIRES:

CERRO GRANDE, Bandelier National Monument. A Type I Incident Management Team (Humphrey) is assigned. The fire is burning one mile southwest of Los Alamos, NM. Crews conducted burnout operations east of the Pajarito Ski Area yesterday. Inaccessible terrain, heavy fuels, high winds, and spotting up to 1/4 mile are causing challenges to containment. The Los Alamos Laboratory, residences, gas pipelines, old growth timber stands, watershed resources, and endangered species are currently threatened.

CREE, Lincoln National Forest. A Type I Incident Management Team (Hart) is assigned. The fire is burning in pinyon-juniper forest near Ruidoso, NM. Torching, spotting and sustained fire runs in the canyon bottoms and slopes were observed yesterday. Four subdivisions remain evacuated. Threats are to the community of Ruidoso, the watershed, and endangered species.

COON CREEK, Tonto National Forest. A Type I Incident Management Team (Bateman) is assigned. The fire is 20 miles north of Globe, AZ in the Sierra Ancha Wilderness. Fire activity was minimal yesterday. Demobilization is in progress. The transition to a Type III organization will occur today.

SOUTHERN AREA LARGE FIRES:

COOK RANCH, Texas State Forest Service. The fire is burning 36 miles south of Ft. Stockton, TX. One mountain cabin was destroyed yesterday, but winds helped slow the fire's spread toward other structures. Burnout

operations are underway on the west flank. Inaccessible terrain and extremely dry fuels are hampering containment efforts.

OUTLOOK:

- *** A FIRE WEATHER WATCH IS POSTED IN NORTH AND CENTRAL NEW MEXICO TODAY FOR STRONG AND GUSTY WINDS ***
- *** A FIRE WEATHER WATCH IS POSTED IN NORTHWEST ARIZONA TODAY FOR STRONG WINDS AND LOW AFTERNOON RELATIVE HUMIDITIES ***
- *** A FIRE WEATHER WATCH IS POSTED IN THE FLORIDA PANHANDLE TODAY FOR LOW RELATIVE HUMIDITIES ***

New Mexico will be partly cloudy in the north and mostly sunny in the south. Winds will be southwest at 15 to 30 mph. High temperatures will be in the 80's and 90's, with cooler temperatures in mountainous areas. Minimum afternoon humidities will be 10 to 20 percent.

Arizona will be mostly sunny and locally windy. Winds will be southwest at 15 to 30 mph. Minimum humidities will be 10 to 25 percent. High temperatures will be in the upper 70's to the upper 80's in the north and warmer in the deserts.

West Texas will be mostly sunny. There is a slight chance of afternoon thunderstorms over extreme southwest Texas. Winds will be southwest at 10 to 20 mph. High temperatures will be in the 90's to 105. Afternoon relative humidities will be 10 to 15 percent.

Florida will be partly cloudy with isolated showers and thunderstorms. High temperatures will be in the $80\,\mathrm{s}$. Winds will be south to southwest at 10 to 15 mph.
